To begin with, he took on people he hadn't even spoken to on the phone, let alone met in person, including a website builder in Kiev, Ukraine, and a customer service manager based in Belgrade, Serbia. Instead they all simply communicated by email, with Mr Cator still based at home in rural Norfolk.

"Our findings suggest that sleep issues are independently associated with alcohol and marijuana use for teens, not just a marker for other risk factors, such as depression," said Wendy Troxel, the study's lead author and a behavioral scientist at RAND Corporation. "Better understanding of the association between sleep and substance use is important for parents, schools and others involved in alcohol and drug prevention efforts for this age group."
